Who Are We?

- MH EnerTech is a trusted and fast-growing technology solutions provider, dedicated to delivering reliable energy and security systems for modern home and businesses. We specialize in a wide range of high-quality products and services including UPS systems, advanced battery solutions, solar energy systems, Genset, Data Center infrastructure, and CCTV surveillance installations. With a commitment to innovation, sustainability, and customer satisfaction, we ensure every client receives tailored solutions that guarantee efficiency, performance, and long-term reliability. Whether it's powering essential equipment, securing valuable assets, or optimizing energy consumption
- MH EnerTech combines technical expertise with premium products to provide smart, dependable, and future-ready solutions. Our professional team works with precision and dedication, making us a trusted partner for organizations and households seeking uninterrupted power, enhanced security, and sustainable energy independence.

Our Objectives:

- We are committed to excellence in everything we do, from the products we offer to the services we provide
- We conduct our business with honesty, transparency, and integrity, building trust with our customers.
- We embrace innovation and technology to develop cutting-edge solutions that address the evolving needs of our customers and the industry.
- Customer satisfaction is at the heart of our business. We prioritize understanding and meeting the unique requirements of each customer, ensuring their success.
- We are dedicated to promoting environmental sustainability by offering energy-efficient and eco-friendly solutions that minimize our carbon footprint.

Our Company Registered In :

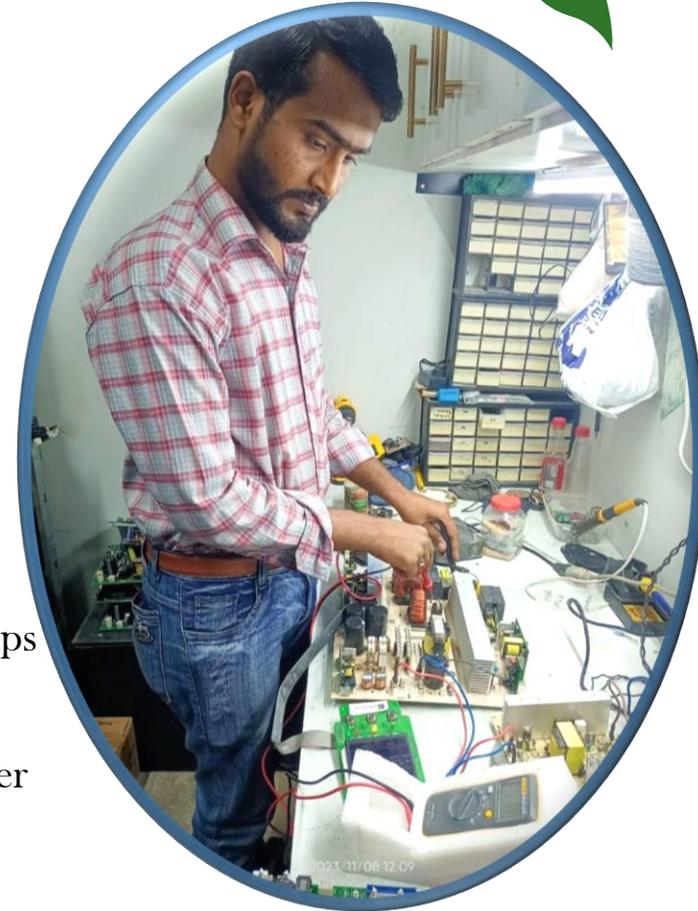

Federal Board of Revenue
Revenue Division - Government of Pakistan

Services We are Providing :

- At MH EnerTech, we pride ourselves on delivering comprehensive power and security solutions designed to enhance efficiency, reliability, and long-term performance for homes, businesses, and industrial clients.
- Our core services include the supply and installation of high-quality UPS systems and batteries, ensuring uninterrupted and stable power for critical operations.
- We also specialize in advanced solar system solutions—from on-grid and off-grid setups to hybrid installations—helping customers reduce energy costs while contributing to a sustainable future.
- In addition, MH EnerTech provides complete data center infrastructure services, offering reliable setups that support seamless IT operations and business continuity. To strengthen security, we offer professional CCTV surveillance and monitoring camera installation services using cutting-edge technology that ensures 24/7 protection of your premises. With a commitment to innovation, customer satisfaction, and technical excellence,
- MH EnerTech stands as a one-stop solution for all your power, energy, and security needs.

Mission, Vision & Values :

- At **MH EnerTech** , our mission is to empower individuals, businesses, and industries with reliable, efficient, and sustainable power solutions. We are committed to delivering high-quality **UPS systems**, advanced battery technologies, **Solar Energy Solutions**, **Data Center Infrastructure**, and **Complete Security Surveillance** setups that ensure uninterrupted operations and long-term energy independence. Our mission is driven by our passion for innovation, customer satisfaction, and the belief that dependable energy is the foundation of modern living.
- **Our vision** is to become a leading and trusted name in Pakistan’s energy and technology sector—recognized for excellence, innovation, and integrity. We strive to shape a future where every home, office, data center, and industry can operate seamlessly without the fear of power disruptions. Through continuous improvement, adoption of modern technology, and expansion of our product and service portfolio, we aim to contribute to a greener, smarter, and more energy-secure nation.
- **Our values** define who we are and how we operate. **Integrity** guides every decision we make, ensuring honesty and transparency in our commitments. **Quality** remains at the heart of our services, as we work relentlessly to provide durable and dependable energy solutions. **Customer-centricity** drives us to understand the unique requirements of every client and deliver tailored solutions with professionalism and care. **Innovation** pushes us to explore new technologies and smarter systems that improve energy efficiency, security, and reliability. And finally, **commitment to sustainability** inspires us to promote eco-friendly solar solutions and energy-saving technologies that benefit both our clients and the environment.
- Together, our mission, vision, and values reflect the core spirit of **MH EnerTech** an evolving company dedicated to powering progress, securing infrastructures, and enabling a brighter, more resilient future for all.

Co-Founder OF MH ENERTECH

- Mr. Mehmood Ali In 2022, He decided to invest in the UPS business. After that started a company in the UPS industry. What started as a job became an integral part of the industry, and with persistence and success, He took the company to new heights, achieving significant milestones by 2024.
- MH Enertech also provides exposure to innovative ideas and technologies and implements things at various levels to our clients in the field of UPS. We cordially invite you to join our cooperation if you need a UPS system with the best technical services

What We Are Providing:

- Industrial Online UPS
- Online UPS Repairs , Maintenance & Services
- Complete Solar System Solutions
- Solar Inverters Repairs , Maintenance & Services
- Complete IT Data Center Solutions
- IT Data Center Maintenance & Services
- Complete CCTV Solutions
- CCTV Maintenance & Services
- Standby Generators

UNINTERRUPTED POWER SUPPLY

Complete Solar System Installation

A complete solar system setup is a fully integrated energy solution designed to provide reliable, cost-efficient, and environmentally friendly power for homes, offices, industries, and commercial spaces. It includes high-efficiency solar panels that capture sunlight, a durable mounting structure for secure installation, and an advanced solar inverter that converts DC energy into usable AC power. The system also features a high-quality battery bank (optional for hybrid/off-grid setups) to store excess energy for backup, along with charge controllers and protection devices to ensure safe and smooth operation. All components are connected through proper cabling, breakers, earthing, and surge protection to maintain maximum safety and performance. A complete solar setup not only reduces electricity bills but also ensures uninterrupted power, long-term savings, and reduced dependence on the national grid making it an ideal solution for modern energy needs.

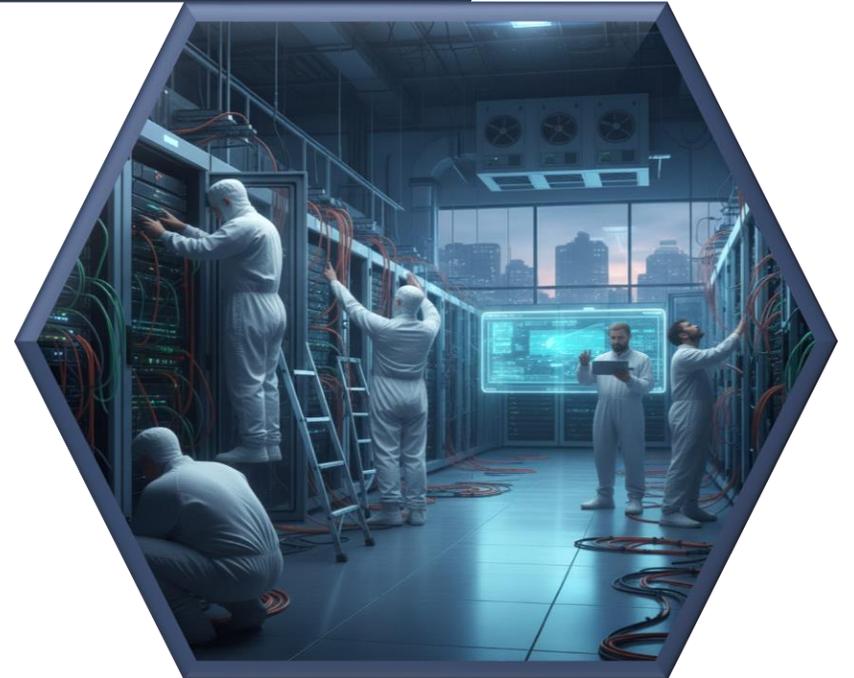

- **Solar Panels:** High-efficiency mono Bi-Facial panels for maximum energy generation.
- **Mounting Structure:** GI or Aluminum frames for rooftop or ground installation.
- **Solar Inverter:** Hybrid, on-grid, or off-grid inverter to convert and manage power.
- **Batteries (Optional):** Lithium or tubular batteries for backup storage.
- **Charge Controller:** Regulates charging and protects batteries from overcharging.

IT DATA CENTRE SOLUTIONS

- At MH EnerTech, We provide **comprehensive, high-performance IT Data Centre Solutions** designed to support modern businesses with reliability, scalability, and intelligent infrastructure. Our **Data Centre** services ensure seamless operations by integrating advanced technologies for power stability, security, monitoring, and efficient data management.
- With a strong focus on **24/7 availability**, we help organizations safeguard their mission-critical operations through optimized infrastructure, fault-tolerant power systems, and smart monitoring tools. Whether you need a new **Data Centre** setup, expansion, or modernization of an existing facility, MH EnerTech, provides reliable, future-ready solutions tailored to your operational needs.

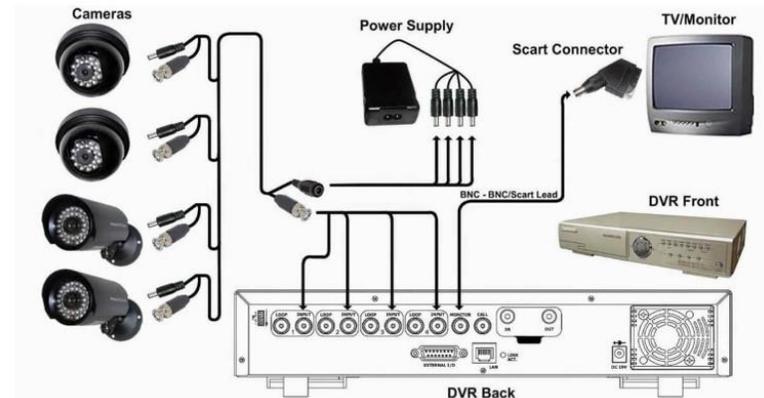

CCTV CAMERA'S SOLUTIONS

At MH Enertech, we provide advanced **CCTV Camera Monitoring Solutions** designed to ensure complete security, real-time surveillance, and peace of mind for home, offices, industries, and commercial spaces. Our monitoring systems are engineered with smart technology that delivers high-quality video, 24/7 remote access, and instant alerts for any suspicious activity.

Our CCTV monitoring service includes:

- **High-definition video surveillance** with crystal-clear footage
- **Real-time monitoring** accessible from mobile devices and computers
- **Motion detection & instant notifications** for enhanced security
- **Night vision cameras** for complete visibility even in low-light environments
- **Cloud & local storage options** to safely store your recordings
- **Centralized monitoring** for multi-location setups
- **Professional installation & configuration** by skilled MH Enertech technicians
- **24/7 operational support** ensuring uninterrupted security

STANDBY GENERATORS

Standby generators from MH Enertech are backup power systems designed to automatically or manually provide power when utility electricity is lost. These systems are commonly used in:

- Homes and residential properties
- Commercial buildings
- Industrial facilities
- Critical services like hospitals, telecoms, data center
- Can be configured to start automatically through an **Automatic Transfer Switch (ATS)** that detects grid failure.

MH Enertech markets them as a way to *stay unstoppable even during grid failures, ensuring essential equipment and operations remain powered*

THANK YOU

Stay in touch for consultations, project inquiries, or support. Our team is ready to provide reliable and sustainable energy solutions tailored to your needs.
